

**Statement on Conflict Materials for Sensor 2016-M**

To comply with Section 1502 of the Dodd-Frank Act, we have requested information from approved suppliers that provide our contract manufacturer components for our devices.

While we are not the primary physical manufacturer of these devices, we are the legal manufacturer and strive to meet or exceed the requirements of the Dodd-Frank Act.

Our due diligence, including a review of suppliers and how they source materials that may be utilized in the production of sub-components of our systems allow us to affirm the following:

A majority of components are sourced outside the Democratic Republic of Congo and nearby countries, as defined with Section 1502 of the Dodd-Frank Act.

In cases where there may be some small amount of 3TG (Tantalum, Tin, Tungsten, and Gold) components sourced in that region, they are sourced from a Conformant Smelter.

To the best of our ability, we meet the intent of the Dodd-Frank Act and will continue to engage with our suppliers to minimize sourcing of materials from excluded, non-conformant smelters.

Attached is a list of components used in the 2016-M device, including approved suppliers. There are references to their policies and in some cases further attachments which include their Conflict Materials Reporting Template (CMRT) Reports.

Designator	Description	Manufacturer 1	Manufacturer Part Number 1	Supplier 1	Supplier Part Number 1	Status	Source
J1	2 Positions Plug Connector 0.047" (1.20mm) Surface Mount Gold	Molex	78171-0002	Digi-Key	WM4459TR-ND		Molex Conflict Minerals Policy
